possible

CERATIN® Surface Treatment

Treatment of turnerbars and rollers with new innovative Surface Technology

Due to the new developed surface treatment the German company Häuser & Co GmbH will create a situation where the pollution of your turnerbars and rollers will decrease extremely and as a result of that the downtime for cleaning will be reduced to a fraction of that what you are used. The Surface Treatment can be done on new bars and rollers but also as a retrofit on used bars and rollers. The new surface is very resistant against mechanical and chemical demands.
